
DETAILS MAIN PAGE (A look alike instagram web app.)

<u>It is the page when everybody gets online for the first time (people dont need to sign up or sign in to see this page).</u>

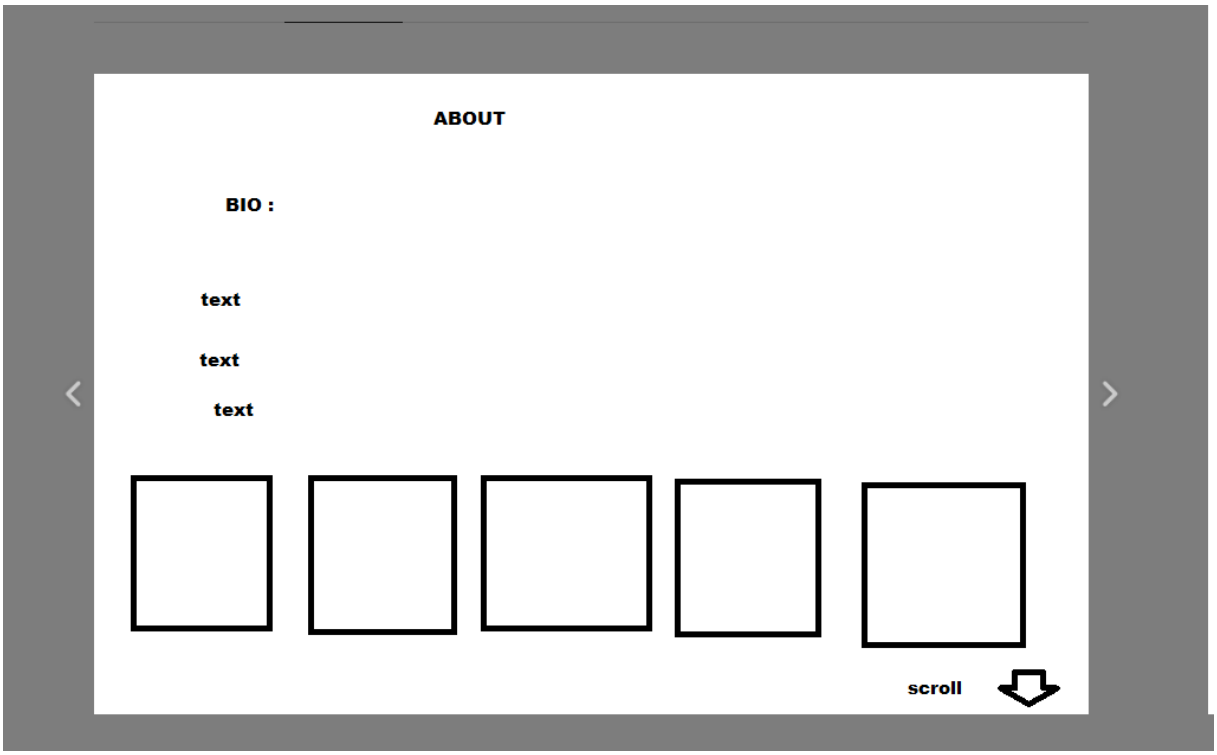
The **colors** of the page are : grey (back), white and black.

1) On the top corner left : the suggestions box (suggestions of random profiles made by users). On the suggestion box there is a button '' More suggestions '' to see more profiles.

2) My subscriptions box : when a user subscribes to profiles he can see some of them here (if the user did not subscribe to any profile it is written : start to subscribe to a profile to see him appears here).

3) Profile info banner : here you can see the username of the profile owner, icones of his twitter/facebook account…, there is also a '' Like '' module icone, comment icone which drives you directly to the comments box, a sharing icone, and signal icone (if offense profile) to signal to administration. And there is a icone ''subscribe'' to follow the profile (if you already subscribed to the profile its written : subscribed. Below Like icone you can see numbers of likes obtained, and below subscribe icone you can see how many subscribers exist.

4) the About box (personnal info of the profile). When you click here a page opens on the page like this (superimposed screen) :



In this box the user can edit his bio, and put pics.

5) the main pic box : the profile owner can put his favorite pic one, only pic (to show how much this pic is important).

6) Comments plug in software like instagram i guess.

7) click on this box to swipe to another random profile (the user click here).

8) Advert banner : random from google adsense maybe ?
